

WASTE MANAGEMENT
ASSEMBLY REQUIREMENTS FOR BIOWASTE BOXES

All waste containers must be:

- Rigid
- Leak-resistant
- Impervious to moisture
- Sufficiently strong to prevent tearing or bursting under normal conditions of use and handling
- Sealed to prevent leakage during transport

PROCEDURES FOR PACKAGING A BIOWASTE BOX

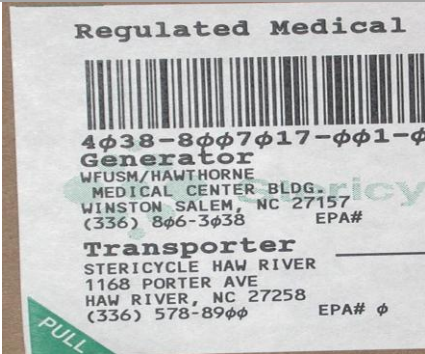

1. Place a red plastic bag in a biowaste box. Double bag wet waste using absorbent material in the inner bag.

2. Twist plastic bag(s) at the top; Seal bag by using filament tape. Seal bags individually when double bagging.

3. Secure box with filament tape.

4. Add pre-generated label to designated area on box.
5. Date the Label.
