NEUROREHABILITATION

WHAT TYPES OF PATIENTS DO YOU SEE?

We see adults with these conditions:

- Stroke
- Spinal Cord Injury
- Brain Injury
- Multiple Sclerosis
- Parkinson's Disease
- Lymphedema
- Low Vision
- Dizziness
- Balance Disorders
- Neuropathy
- Amyotrophic Lateral Sclerosis (ALS or Lou Gehrig's Disease)

WHY SHOULD I CHOOSE YOUR PROGRAM?

We offer a unique approach for treating people recovering from neurological impairments. Our experienced team is trained in many specialty areas including vestibular and balance rehabilitation, lymphedema management, cognitive retraining, and VitalStim therapy for swallow retraining. We also have state-of-the-art equipment such as advanced electrical stimulation to retrain muscles after stroke and other neurological injuries, partial body weight supported-treadmill training, and advanced splinting techniques for contracture and spasticity.

Our team includes physical, occupational, recreational and speech therapists. Patients and their caregivers play a vital role in our team approach. We also have a social worker and assistive technology consultant who work with our patients.

Our therapists collaborate with patients and caregivers to set therapy goals and achieve desired outcomes. Our team meets on a regular basis to discuss patient care and will consult with your doctor or other departments and specialists as needed.

WHAT SPECIALTY CLINICS AND PROGRAMS DO YOU OFFER?

- Driving Evaluations
- Vestibular Rehabilitation
- Wheelchair and Seating Assessments
- Club Independence
- Low Vision Evaluation
- Lymphedema Management
- Assistive Technology Lab
- Consultation with Vocational Rehabilitation
- ALS Clinic
