

Carpenter Library News

New Study Rooms

Carpenter Library has recently added two new group study rooms. This makes a total of five rooms available that can be reserved for group study. In order to facilitate registration and use, we have renamed the rooms.

- Orange Study (formerly Classroom D)
- Blue Study (formerly Library Conference Room),
- Green Study (*new room* off the History of Medicine Room)
- Purple Study (*new room* off the History of Medicine Room)
- Red Study (formerly SGI room, in Reserve Reference area)

Rooms may be reserved, for up to two hours, at the front desk. The study rooms are for group study. Single occupants may get bumped. White boards and overhead projectors are installed in each room.

Call 716-4414 or to reserve a room.

Library Remodeling This Summer

Carpenter Library will undergo renovation this summer, so watch for signs of construction and temporary relocation of familiar services.

We will reconfigure the Information Desk at the entrance of the library. All public computers will move to the center of the library, closer to the new desk. Outlying areas of the library will provide more quiet study space.

All Circulation and Reference services will continue jointly at the new Information Desk. Thanks in advance for your patience. We will make announcements as renovation dates are finalized.

NIH Public Access Policy First Anniversary Update

Just over one year into the mandatory [NIH Public Access Policy](#), compliance by NIH-funded authors has improved, but still has room to grow. All original articles stemming from any research funded by the NIH, where funding was active from October 1, 2007 forward and accepted for publication on or after April 7, 2008, fall under the Policy. These must be submitted for public access via [PubMed Central](#) as a term and condition of the funding award.

As an early anniversary “gift,” the Public Access Policy received additional support in early March. On March 11, 2009, President Obama signed the 2009 Consolidated Appropriations Act, which included a provision making the Public Access Policy permanent. Although this new provision does not protect the Policy from being overturned by future legislation that would alter Federal copyright law, it does demonstrate the government’s commitment to the NIH and the Public Access Policy.

If you are in the process of authoring a paper stemming from NIH-funded research and need information on how to comply with the Policy, check out the [NIH Policy Guidance resource page](#) on the Carpenter Library website. Here you will find guidance and tools to assist you in addressing copyright during the publication process, submitting your accepted article to NIH for deposit in the PubMed Central archive, and properly citing your articles on grant applications, proposals and reports using the PMCID number.

If you have questions about the Policy, or would like to schedule a class or presentation for yourself, your research group or your department, please contact Molly Keener at mkeener@wfubmc.edu or 716-4203.

Bioinformatics Web Page

A new [Bioinformatics](#) gateway page has been added to the Library’s web site listing a wide variety of free bioinformatics resources. The link is on our home page under Resources. The sites are arranged under 4 headings.

- 1. Databases** - covers gene banks, chromosomes, and other structures pertaining to humans, animals, and plant life.
- 2. Tools** - lists additional sites that allow the study of such structures.
- 3. Vocabularies** - refers to the Gene Ontology project which provides a controlled vocabulary to describe gene and gene product attributes in any organism.
- 4. Literature Searching** - provides sites for accessing published literature on bioinformatics.

North Tower Panel Collection

For years, there was a collection of 49 photo panels displayed in the main floor hallway of North Tower that depicted persons, buildings, and events in the history of Wake Forest University Baptist Medical Center. Creative Communications created the photo panels in the late 1980s. The original panels were taken down in January 2009 to make way for the new sets of panels. The Dorothy Carpenter Archives has preserved the original images online.
