Re: New Instrument for Free Light Chains with Ratio

On March 21, 2017, the Clinical Laboratory will begin using a new instrument to perform Free Light Chains with Ratio. The test will appear in CareEvolve as **Free Light Chains with Ration** (test code **FLCR**).

- The container description will be: Gold 3.5 or Red Plain.
- The minimum volume will be: 1.0 ML.
- The new storage requirements will be: Refrigerate.
- Special Instructions: Avoid hemolysis.

If you have any questions related to this test change, please contact the Core Laboratory at 716-2610.
