

CareEvolve/Beaker GoLive Items

- If you need to access the previous SunQuest version of CareEvolve after the cutover Friday night, the link to access it is <https://wf.careevolve.com>. You can look back there at any time to review orders and results. Your log in credentials will remain the same in both CE environments.
- Results on lab work collected over the weekend will be sent to the EMRs Monday 8/8 (*only for locations that have result interfaces with EMR via CareEvolve*).
- We will start installing the new Zebra printer Monday at offices that currently have CXIs. While these printers are being installed, the offices will label specimens with a Dymo label from CareEvolve.
