

Kidney/Pancreas Transplant Candidate Monthly Serum Screen

Please submit this form with each monthly serum sample. If you have questions, please call the HLA/Immunogenetics Laboratory at Wake Forest Baptist Health at (336) 716-4456 or the office of Transplant Services at (336) 713-5673.

Monthly collection of patient serum (10 ml red top tube) is vital to the success of organ transplantation. Serum screens detect antibodies which might cause rejection of future transplants.

Patient Name _____ SSN/Medicare # _____

Date of Birth _____ NCBH Medical Record Number # _____

Collection Date _____ Drawn by _____

Clinic/Dialysis Center _____ Phone _____

PATIENT NAME, COLLECTION DATE, AND A UNIQUE IDENTIFYING NUMBER ARE ALSO REQUIRED ON EACH TUBE LABEL.

Transfusion(s) Transplant (Location) _____ Pregnancy (*including miscarriage*)

Infection(s)

Date(s) _____

Submission of Sample:

- All samples must be drawn in 10ml red top tubes without serum separators. Please do not remove sera from original tube.
- All necessary precautions must be taken to avoid exposing the serum to temperature extremes. Avoid having the package sit on a hot loading dock or directly on ice.
- Do not send packages for weekend delivery.

***** For additional shipping containers please call Path Tec at (706) 569-6368*****

Ship to: HLA/Immunogenetics Laboratory, Wake Forest Baptist Health,
145 Kimel Park Dr., Suite 250, Winston-Salem, NC 27103.

Serum must be received by the HLA Laboratory within seven calendar days of collection.

Sera which exceed this time limit will be deemed unacceptable by the laboratory.
