

Membership Application

The mission of the Center for Public Health Genomics (CPHG) is to encourage and facilitate research related to the genomics of diseases and disorders of significant personal and public health burden through the exchange of ideas, interdepartmental collaborations, and development of shared analytic tools and analysis pipelines. CPHG's focus is primarily on the quantitative and population-based aspects of genomics research and is complementary and synergistic to other genomics efforts.

Please complete the information below to request membership with the Center for Public Health Genomics.

First Name: _____

Last Name: _____

Institution Affiliation: _____

Department (primary department of appointment): _____

Please indicate the type of membership that best suits your interests:

Principal Member: A faculty member who actively participates in the Center's activities and is an active investigator (e.g. principal investigator, co-investigator) on research projects at the intersection of genomics and public health.

Associate Member: Individuals who conducts or is interested in research at the intersection of genomics and public health.

Trainee Member: A student, resident, fellow or other trainee working or interested in genomics and public health.

Staff Member: Staff working or interested in genomics and public health.

Affiliate Member: An individual who is not part of Wake Forest University Health Sciences but may have an adjunct faculty appointment or be a member of a foundation or community organization who has an interest in research at the intersection of genomics and public health.

Briefly describe your research interests and why you would like to join the Center for Public Health Genomics:

Questions regarding CPHG membership should be directed to Laurie Russell, lrussell@wakehealth.edu.
