

**Center on Diabetes, Obesity and Metabolism
Seminar Series Presents:**

Metabolomics Reveals New Cardiometabolic Disease Mechanisms

Christopher B. Newgard, PhD
Founding Director, Duke Molecular Physiology Institute

Dr. Newgard is the Founding Director of the Duke Molecular Physiology Institute. He is also the Director of the Sarah W. Stedman Nutrition and Metabolism Center at Duke, with faculty appointments in the Pharmacology and Cancer Biology and Internal Medicine Departments. Dr. Newgard's research focuses on application of an interdisciplinary approach to gain mechanistic understanding of complex cardiometabolic diseases. This interdisciplinary approach includes gene discovery, metabolic engineering, and comprehensive tools of metabolic analysis ("metabolomics") such as mass spectrometry-based metabolic profiling.

Monday, February 1, 2015

4:00 – 5:00 p.m.

Comprehensive Cancer Center, 10th floor, Room 10B

 **Wake Forest[®]**
