	<b>22</b>	No Journal Club – Christmas Holiday
	<b>29</b>	No Journal Club – New Year's Holiday

\*Journal Club will move to one of the Biotech Place conference rooms once Molecular Medicine moves to BTP. Additional information will be provided when that occurs.

**Guidelines for journal club presentations:**

The general theme for this journal club is inflammation/metabolism with presentations of high quality papers from current literature. Each presentation should begin with a 15-20 min review of the subject covered by the paper, followed by a review of the paper. Since many high quality papers often contain more data than can be presented in a 40-45 min time frame, the presenter needs to present the most relevant results. Please send a PDF copy of the paper to Janet Sawyer (see below) on the Tuesday preceding your presentation so that the paper can be posted on iShare and so that others can read it ahead of the discussion. If you are presenting data please send a title of your presentation by Tuesday at noon. If you have a conflict and need to change dates with someone, it's your responsibility to make the change. You are expected to plan well enough that cancellations are not necessary. Please notify Janet Sawyer of any changes, so an accurate schedule may be kept.
