

INTERN DAY 2

Course Objectives:

Duration:	One and one-half hours, videotaped solo performance
Faculty:	One instructor/operator
Location:	Simulation suite and debriefing room
Schedule:	Blocked time out of OR, first week. Potential after-hours debriefing.
Purpose:	To operate the anesthesia equipment and apply the skills learned in Day 1.
Preparation:	Review and memorize Day 1 material Review and study the videotaped demonstration, "Anesthesia Machine Checkout" by Dr. Olympio.

At the end of the second Day, the anesthesia intern will:

- Check the anesthesia machine and discover two faults
- Arrange the ploss cart while reciting concentrations and dosages
- Explain the purpose and application of multiple airway devices
- Prepare the patient for induction of anesthesia
- Operate and adjust the anesthesia machine as requested
- Operate and adjust the cardiovascular monitor
- Review their performance on videotape during debriefing
